

2024
NEW ARRIVAL

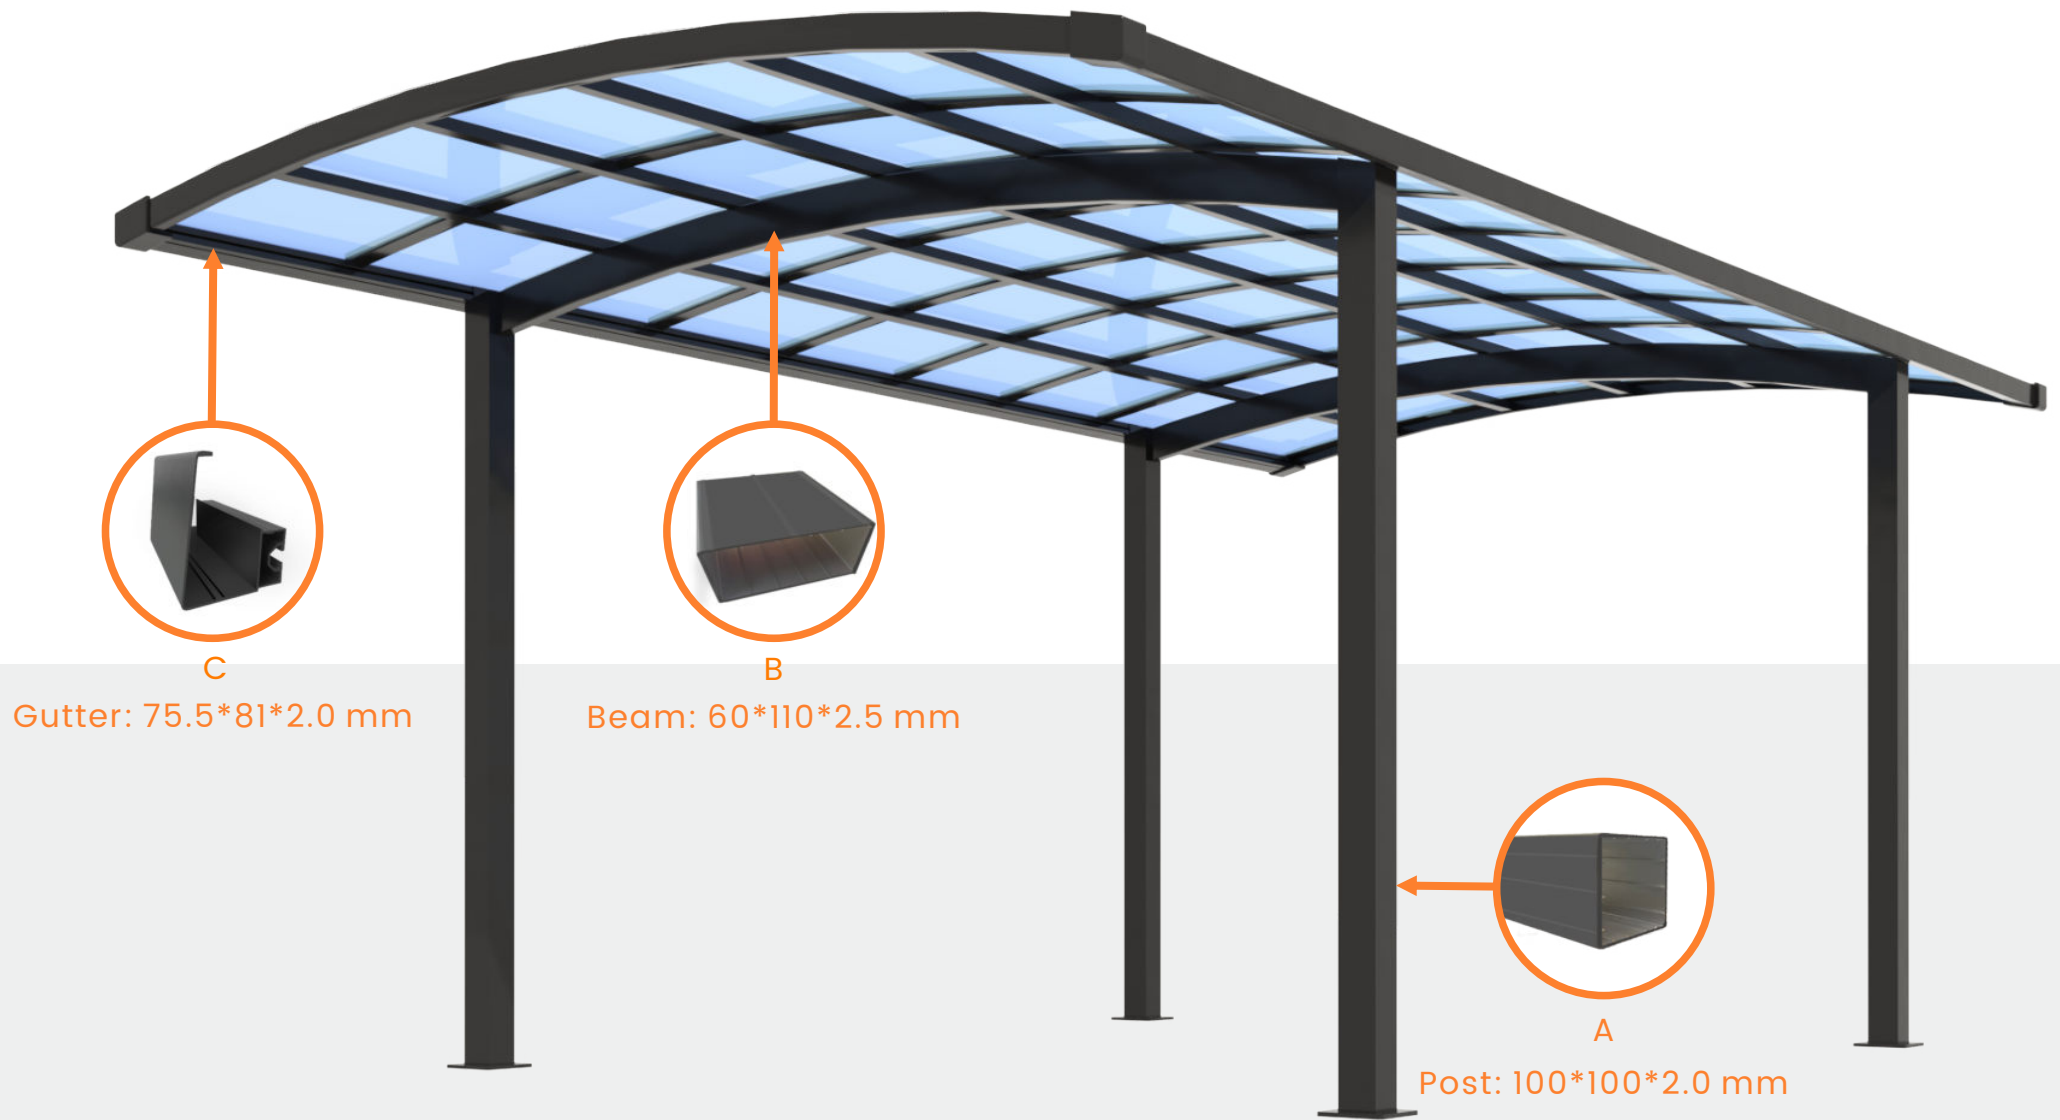

**Aluminum
Curved Carport**
Carp-X

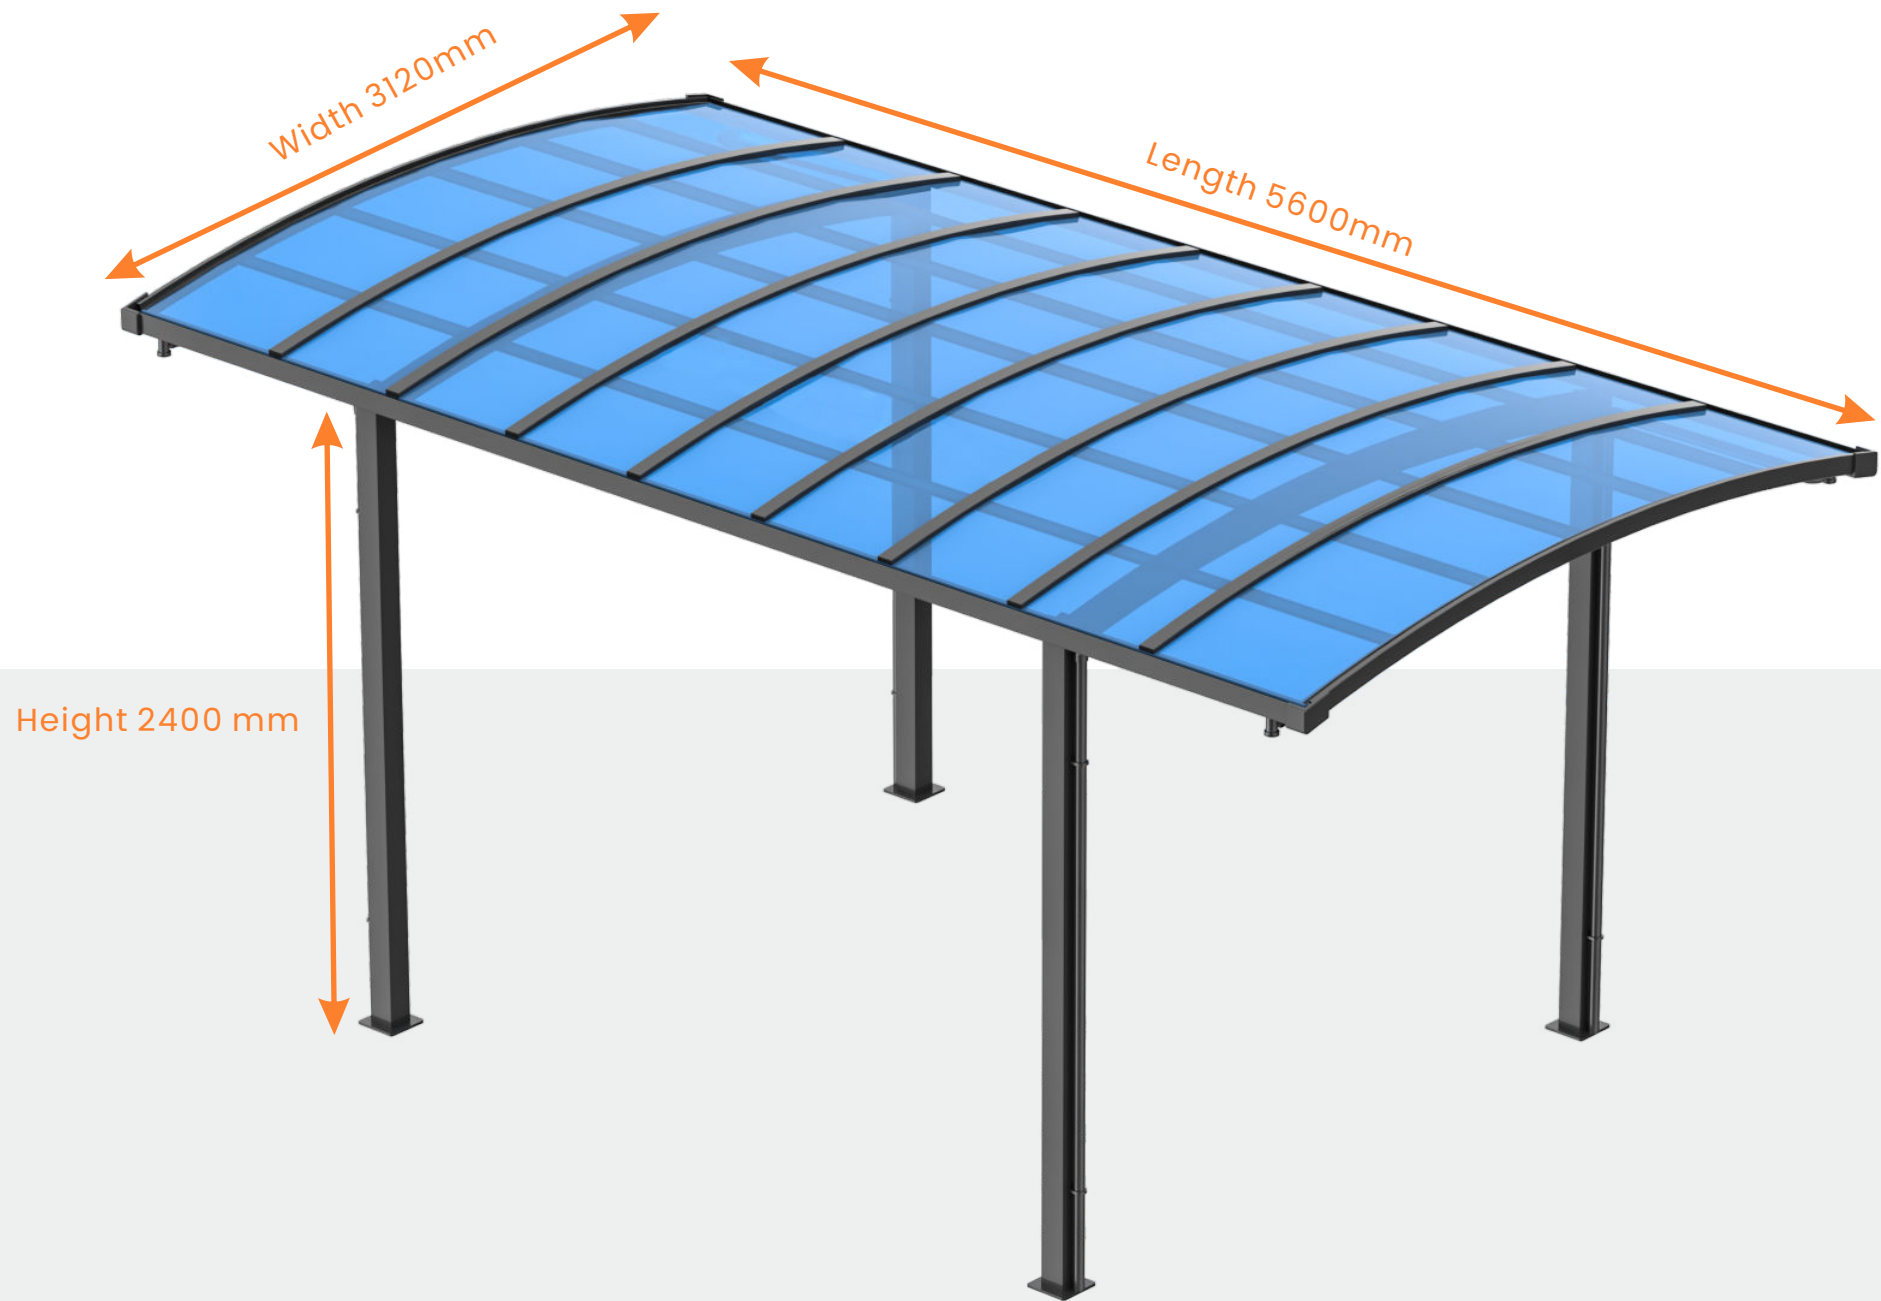

Aluminum Curved Carport

Carp-X is a great solution for offering shelter and protection for your loved vehicles. Pre-engineered with DIY features, this carport can achieve quick installation and provide better snowloading (up to 50cm thickness snow) compared to other alternatives you can find on the market. With its simple layout and clean lines, Carp-X is built to combine contemporary design principles while focus on functionality. Besides a very good price/performance-ratio in design, we make a maximum loading capacity of 70pcs per 40HQ possible to enhance our customer's competitiveness.

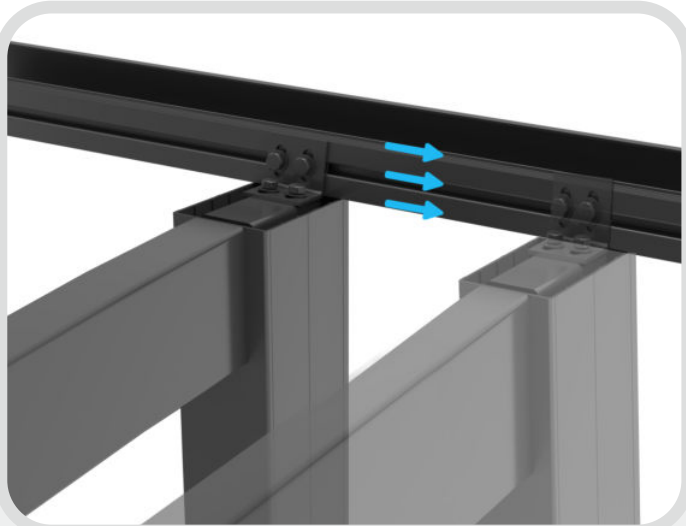

Specification

Standard Size

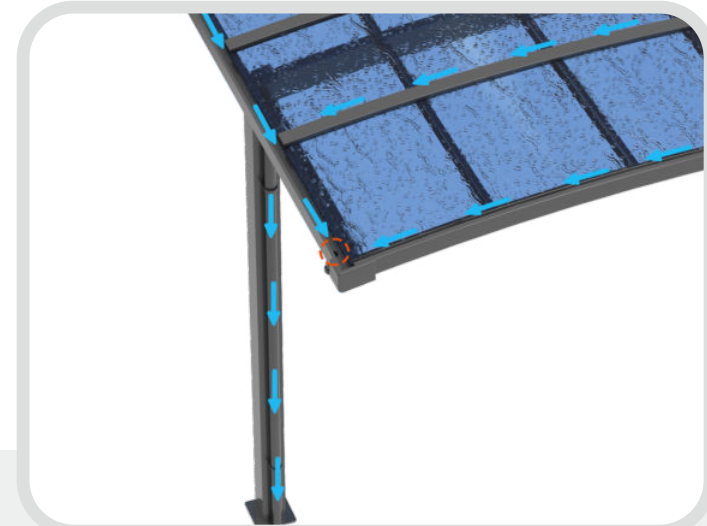

Product Features

- 1 Modern design with posts and gutters connected by corner steel liners, allows the posts to move slightly back and forth is between 3100mm-3400mm.

- 2 Base plate cover to hide the screws after anchor bolting the base plate into cement, provides a solid structure and achieve the least possible amount of visible connections for a more aesthetic outlook.

- 3 Drainage system: drainage from both sides of the gutter to the aluminium downpipe.
